Contact About Us A tutorial for aspiring creatives and people who are learning basic concepts of graphic design, photography, and videography. We are always open for feedback, so if you have any concerns or comments, we would love to hear from you! If it wasn't obvious enough, the second episode of Quantum Break aired Tuesday night. Now that it's over, and it's safe to say that the credits have finished rolling, you can stop wondering how the heck the show could have gone on for another two hours. If you're like me, you probably spent most of that time trying to figure out what happened to Paul, a character who you loved in a TV show that didn't really exist. The most common theory is that he went into some sort of experimental Quantum Leap-like program. The less popular theory, which feels like it should've been right there at the top of the list, is that he was killed. For those still wondering, the answer is both, but mostly a little of both. In an interview with Inverse, writer and showrunner Remi Aubuchon explained that while you'll be meeting Paul during the show's third episode (the one that aired today), he isn't the final word on what's happened to him. "So you get a little bit of both," he told Inverse. As for why Paul seems so familiar even though the show hasn't aired yet, Aubuchon had an answer for that too. "He comes back, and he has a whole bunch of experiences, he goes on adventures," he said. "That's part of the reason he's back and you know he's going to have a 82157476af
